Drivers Information

1. Have your car filled up with gas before you arrive to be a driver. Zero out your odometer at the HS.
2. Arrive at Baker High School Room 106 Friday at 8:30am and 6:30 AM Sunday at the Baker High School for ALL drivers/radio operators.
3. Find which category you assigned to then pick up supplies to your race group
4. Handheld radio for car
5. Rooftop flasher/paper that goes under it
 - Antenna
 - Car Window Sign
 - Water
 - Wheels for your team (outside)
6. Familiarize yourself with the handheld radio. It will be programmed and locked to Channel 1 DO NOT CHANGE IT to make sure it works as soon as possible. DO a radio check with your category. If something is not working bring it back in to exchange ASAP.
7. Make sure your cell phone is charged and on in case a radio is not working or in the case of an emergency.
8. Attach your category window sign with tape to your outside lower left rear window. A volunteer will mark your passenger side front windshield, upper corner with the exact same thing as your rear window sign.
9. Drive with your hazards (blinkers)
10. Meet your OBRA official outside
11. Move your car into the correct order of what your official says
12. Exchange phone numbers with your caravan in-case radios don't work
13. Wait for an official to give directions for when to leave

- Communication within the peloton/race there is a Lead driver, Com 2 and Com 3 (wheel Support) and Com 1 which is your race official for your category. To address your caravan on the radio start out by saying what category you are in and your Com #. (For example) you want to ask your race official a question. You would say: this is Men 3, Com 2 to Men 3, Com 1(your race official)Then ask your question.
 - (Another example) “This is WOMEN’S Com 2 to WOMEN’S LEAD. Can you move ahead to see if there are oncoming cars? I have a car, who wants to pass?”
 - Always listen to your OBRA officials directions
1. Support drivers be prepared to quickly stop and give a rider a spare wheel from your car if they have a flat. If it is a rear flat ask if they need a 10 or 11 speed wheel. Record the race # of the rider that flatten and the name that is on the wheel. Give these notes to the finish line. It is safer to let your radio operator get the wheel out. If you do not have a radio operator please make sure there are no CARS or BIKES PASSING! Divide wheels evenly between support cars both front and rear wheels. if you've stopped to help a rider with a flat tire, you are not allowed to “pull” them back up to the group. They must regain the group on their own. If the rider attempts to “draft” your vehicle back to the group, speed up and return to your position with the caravan.
 2. Be especially cautious of riders behind you on the downhill – they will be going a lot faster than you think! Descend down the hill ahead of riders a good distance to be safe.
 3. If riders need your help, they will pull off to the side of the road; try to stop behind them and on the side of the road. Do not stop in the middle of the road!
 4. It might be a hot day. If riders appear to need water, unscrew the cap of a bottle of water and offer it to them. You also might be asked to refill a bottle. If a racer litters write down their bib #. If a racer raises his left hand it means he wants water.

*****Please remember to return all radio, equipment & wheels after to**

Locations discussed before each race *****

Thank you for Volunteering for BCCC, YOU ROCK! Please join us for the spaghetti feed and awards ceremony at Churchhill Music and Art Venue on Friday evening from 5-7 and the Chili Feed and Awards ceremony on Sunday at the top of Dooley Mountain
